Pattern: 31 July

A fur-themed crochet along!

The Bushy Tails Expedition is a furry jungle animal adventure brought to you by Projectarian in collaboration with your favourite amigurumi designers! Top designers from around the world have teamed up to present you with a collection of exotic and beautiful creatures. Track each one in their natural habitat as you embark on this magical wildlife journey.

The patterns in this CAL will teach you how to make seven different creatures, each using a unique method for creating their special fluffy features. Every pattern will teach you something new and add a bedazzling beast to your little wild jungle collection!

Photos of each elusive animal will only be revealed on the pattern release date but pattern information will be available in advance. Visit each designer on Instagram one week before their pattern release date to find their supplies list so you can prepare in advance for your project (click on each one to follow them).

Visit Projectarian.com for more info and FAQ about the CAL.
